To The Deputy Commissioner
Chitaldroog District

Sir,

With reference to Correspondence ending with your reminder No. 402 of 4th June 1901, regarding feeder to Kolalkere Doddakere, I have the honor to inform you that the project has already been condemned by the late Executive Engineer, on grounds stated in this office No. 166 of 16-10-11

undersigned wanted, as
to look into the question once more
when at Kolaltáré lately, but
had to return owing to urgent
work. The matter will be seen
into and a reply forwarded
in August 1901, if not earlier.

I have the honor to be

General No. 473- } 1901-02
No.

Enclosures Number. 2.

Proceedings of Government
No. 2724 (37) dated 13th August
1901 calling for further
report regarding the
construction of a feeder
to Holalkere Hirekere tank.

With reference to the
above has the honor to forward
copy of Executive Engineer's
docket no 166 dated
25th September 1896 to the
address of the Chief Engineer
of Mysore together with
copy of Executive Engineer's
docket no 621 of 21st Sept 1901
from which it will be seen
that the work referred to
is not practicable owing
to

to the cold-hearing prohibitively enormous.

Narain Rao

Deputy Commissioner

General No. 166
No.
} 1901-02

Enclosures Number.

Dassar a Subject-no 78 of
1895.
Hirekere tank, Holalkere
Taluk.

With reference to Chief Engineer's no 4835 dated 15th September 1896, has the honor to report that the cost of the project will be about Rs 60,000/. The site from which the feeder is to be taken off intercepts a drainage of 7 30 Square miles, but the catchment is hilly and steep, 20 units per Square mile may be safely calculated upon Thus 14 units are available from

com
out now is 7 miles. It crosses major
draining into Adaniur tank, a major
by the P. W Department in 1890-91.

2. Begs to note the head of the halla is
Kodi of Hire kere being 50.00. Giving 2 feet
mile, the starting point of the feeder bed the
of the feeder being 7 miles will be 64.00, that is 14
of water must be allowed to be stored in the new
before the feeder is expected to act, which may
looking into the nature of the country a storage
50 to 6 mints at the site itself. The actual quantity
which can be made available from this project
therefore be only 80 units at the cost noted above.

3 The idea of feeding the tank from the
halla may therefore be given up, the cost being
enormous.
